PROFILE

Product and technology leader with 9 years leading multidisciplinary teams and digital platforms across Latin America, the US, the Middle East and Australia. I have owned product vision and roadmap, planning with interdependent teams, the relationship with client VPs and directors, and the P&L of the accounts I lead.

I combine strategy and execution. I have built areas and operations from scratch, like the R&D area at Tecnoglass and the whole Kivval operation, and changed how teams deliver. I use AI (Claude and Cursor) to automate repetitive work and build mockups that I validate with the market before committing engineering.

I have worked across industries: entertainment and tourism tech for Disney Parks and Qiddiya City, automotive with Kivval, and construction and manufacturing with ES Metals (Tecnoglass) and Metrix Group. In tech I have owned transactional platforms with checkout, payments, card linking, B2B credit and pricing engines.

EXPERIENCE

Globant · Senior Tech Product/Project Manager, Disney Parks — Dec 2025 – Present

Core e-commerce platform (ticketing, checkout, payments and pricing) that the client's other platforms depend on. Team of 20: Java engineers, QA, business analysts, automation engineers, architects and product managers.

- **Results:** raised delivery commitment from 67% to 95% in one year by aligning business requirements and technical criteria in an AI-assisted repository.
- **Results:** redesigned the partner interface so partners create their own products without depending on the team.
- Define the product vision and roadmap aligned with the client's annual OKRs, and turn them into sprint deliverables.
- Lead PI Planning with 7 interdependent teams: scope, capacity, objectives and cross-team commitments.
- Manage the relationship with client VPs, directors and managers, including on-site visits to review priorities, risks and contracts.
- Align architecture, technology, delivery and product on prioritization, dependencies and risks.
- Lead change management: new processes, roles and clear expectations for the team.
- Find account expansion opportunities together with the Delivery Managers.
- Diagnose and redesign workflows, and automate repetitive work with AI (Claude and Cursor).
- Own the P&L of a US$2M account (forecast, margin and billing) and report it through dashboards.

Globant · Senior Tech Product/Project Manager, Qiddiya City and Saudi Seven Parks — May 2024 – Dec 2025

B2B ticketing platform for Six Flags Qiddiya and Aquarabia, part of Saudi Arabia's Vision 2030. Team of 32: web (React, Svelte), Node.js, QA, automation, UX, visual design, business analysts and DevOps.

- **Results:** launched the MVP for three parks on the committed date.
- **Results:** at Saudi Seven Parks, wrote the PRDs and led mobile and web UX/UI for account management.
- Led discovery and backlog definition: partner journey, pain points and prioritization.
- Defined the transactional modules: checkout, payment methods, card linking, B2B credit lines and partner onboarding.
- Coordinated integrations with CRM, CMS, the ticketing system and the payment gateway.
- Managed stakeholders across the client, internal teams and vendors, and unblocked third-party dependencies.
- Negotiated scope with the client and made tradeoffs explicit to protect the launch date.
- Monitored project profitability and guided the product on site during UAT.

Globant · Product & Project Manager, Disney Parks e-commerce — Jul 2022 – May 2024 · Jun – Dec 2021

Online ticketing and US parks. 5 teams, about 25 people.

- **Results:** designed the opportunities-management process for Globant's Disney PMs, adopted as a standard across LATAM.
- Led product and delivery: backlog, prioritization, and Definition of Ready and Done with engineering leads.
- Managed account finances: P&L forecast, billing, margins, and fixed-price, staff augmentation and T&M contracts.
- Facilitated Scrum, coached teams, trained junior PMs and onboarded new people.
- Found and developed new business opportunities with Disney managers.

Kivval · Co-founder and Product Lead — 2021 – 2025

Platform to buy and maintain vehicles in Colombia. Full-time Jan – Jun 2022, then partner.

- **Results:** 35,000 people in the first year and break-even in 2024.
- **Results:** Top 6 of 125 in Ruta N's Valle del Software; Startco 2022 with Bancolombia.
- Started the operation: built the team, defined processes, and set financial and product goals.
- Defined strategy and roadmap based on user research and KPIs.
- Led the outsourced tech team through the whole cycle: discovery, design, development and launch.
- Ran the commercial strategy, B2B partnerships (financing, insurance and services) and the marketing and brand plan.
- Used data to decide what to evolve and what to retire in the product.

ES Metals (Tecnoglass) · Project Manager and R&D Coordinator — Aug 2019 – May 2021

- **Results:** delivered projects with solutions found by R&D, such as the thermal insulation for 135 East in Manhattan.
- Created and led the R&D area: search for new products, processes, materials and suppliers.
- Planned and controlled schedules and budgets for facade projects in the US.
- Coordinated design, engineering, production, purchasing, dispatch, installation and logistics.
- Handled client relationships and negotiations, and coordinated marketing materials.

Metrix Group, Melbourne · Industrial Design Team Lead — Aug 2017 – Jul 2019

- **Results:** cut change-order time from 45 to 15 minutes with Lean.
- Led a team of 6 across design, programming and production, with daily and weekly goals.
- Standardized processes, defined roles and trained staff.
- Turned projects into technical drawings and G-code for production, and managed raw materials.

PROJECTS

- **The Beer World (2025):** product strategy and working prototype, built with AI tools, for a two-sided craft-beer marketplace. 8-month MVP plan with a €491k budget. Earned me a job offer.
- **Lead CRM (2024, TOM Consulting):** CRM built in Bubble for a marketing agency. Pivoted to serve the agency itself and tested it with 5 clients.

KEY SKILLS

Leadership and strategy: teams of up to 32, change management, relationships with VPs and directors, negotiation and contracts

Product: vision, roadmap, discovery, user research, PRDs, prioritization, evolving and retiring products, business cases, go-to-market, P&L

Payments and transactional software: checkout, payment gateways, card linking, B2B credit lines, pricing and offer engines, billing

Integrations: APIs with CRM, CMS, ticketing and payments; dependency management across platforms

Scaled agile and portfolio: SAFe, PI Planning, Scrum, Kanban, cross-team risks and dependencies

Metrics: product KPIs, conversion, LTV, dashboards and reporting

UX: flows and prototypes in Figma

AI and automation: Claude and Cursor to automate repetitive work and build mockups for fast market validation; Bubble; process automation

Methods: Lean Six Sigma, design thinking, process mapping

EDUCATION AND CERTIFICATIONS

Product Design Engineering Universidad EAFIT, Medellín	2011 – 2016
Product Management Colectivo 23, Medellín	Apr 2026
Introduction to Behavioral Science Universidad EIA	Sep 2025
Certified SAFe 5 Product Owner / Product Manager Scaled Agile	Jan 2022
Certified Scrum Master Scrum Alliance	Jan 2022
Green Belt, Lean Manufacturing and Six Sigma Vative, Melbourne	2018
Certificate IV in Marketing and Communications Australian Institute of Technology, Melbourne	2018
Scrum Foundations Professional Certificate Cerprof	2020
Microsoft Project	2019
